

IN THE ABSTRACT OF THE DISCLOSURE

Replace the Abstract of the Disclosure currently of record with the attached new Abstract of the Disclosure:

Mounting equipment comprises a brush which brushes an edge portion of a liquid crystal cell and removes the contaminating dust attached to this edge portion, an ionizer for injecting an ionized gas toward a portion to contact at least the edge portion of the liquid crystal cell of this brush, and a discharge pipe provided within a cleaning case for absorbing and removing the gas injected toward the brush from this ionizer.
